

Safety Huddles. Digitized, Simplified, Scaled.

Driving Quality, Safety, and Enterprise-Wide Communication

Patient safety depends on seamless communication from the unit level to the executive suite. Gaps between frontline teams and leadership can delay risk recognition, reduce situational awareness, and compromise patient outcomes. Safety huddles—whether tiered across the organization or managed by a dedicated team—are proven to strengthen situational awareness, identify emerging issues, and accelerate resolution. SafetyHuddle digitizes and streamlines this process, enabling data collection, real-time communication, consolidated system level information, accountability, and proactive risk mitigation - transforming your huddles into powerful drivers of quality improvement.

What We Offer

Traditional huddles often rely on verbal updates, scattered notes, spreadsheets, and manual follow-up, making it difficult to track trends, measure impact, or close the loop on issues. SafetyHuddle centralizes this process, enabling:

- **Early Issue Identification & Prevention**
Identify and capture safety concerns, potential risks, root cause, or updates directly in the system during huddles, whether through a dedicated team or a tiered system approach.
- **Streamline Decision-Making**
Break down communication silos with automated, integrated notifications, providing each level of the organization a clear view of current issues and responsibilities.
- **Closed-Loop Resolution**
Facilitates organizational awareness through integrated task management and end-to-end issue tracking to keep all areas of the organization informed.
- **Data-Driven Improvement**
Digital tracking enables robust reporting, trending, and analysis to uncover recurring risks, measure response times, and guide strategic quality initiatives.
- **Permission-Based Access**
Maintain privacy and compliance by controlling visibility of sensitive data by role or team.

Key Benefits

- ✓ **Increase Patient Safety & Quality** – Identify patterns before they become problems through built-in analytics and trend monitoring. Proactively address risks, ensure accountability, and align with HRO and PSO principles.
- ✓ **Boost Operational Efficiency** – Replace fragmented reporting with unified, real-time data accessible across the enterprise.
- ✓ **Enhance Employee Engagement** – Encourage team communication, enabling them to thrive and engage.
- ✓ **Enable Organizational Alignment** – Customizable digital boards display live updates, KPIs, and action items at a glance.
- ✓ **Integrate Seamlessly** – Connect huddle data to Sentact's Rounding, Feedback, OnDemand, and ViewPoint for a comprehensive, enterprise-wide safety and quality view.

How It Works

SafetyHuddle is a healthcare-native huddle management solution that empowers organizations to improve safety, performance, and communication at every level—from frontline staff to the executive suite. Built specifically for healthcare teams, SafetyHuddle delivers structured, real-time collaboration that drives high reliability, fast issue resolution, and sustained operational excellence.

1	Structure		2	Capture		3	Escalate	
Customize your safety huddle to your organization's needs, whether through a dedicated team or a tiered approach			Records identified issues and resolution status with automated data gathering			Automates escalations to communicate status to all impacted levels of the organization - from frontline staff to the executive suite		
4	Resolve		5	Analyze		6	Improve	
Assigns, tracks, and closes out action with full accountability and documentation			Dashboards and reports reveal trends, root causes, and performance metrics			Data trends inform operational priorities and performance plans		

SafetyHuddle transforms a critical daily practice into a strategic asset—empowering hospitals to identify and mitigate risk faster, improve outcomes, and foster a culture of safety at every level.

Work With Us

With 20+ years of experience and 800+ facilities contracted across the country, Sentact is helping healthcare leaders deliver high reliability for every aspect of care.

Sentact includes a full suite of applications—covering rounding, safety huddles, service request management, patient and staff feedback, compliance tracking, and more—so you can address every aspect of care and operations. Explore the complete Sentact solution suite to see how it can transform your organization.
